

AMOGH MARATHE

Denver, CO | (214) 718-5452 | amogh13marathe@gmail.com | linkedin.com/in/amoghmarathe

SENIOR TECHNICAL PRODUCT MANAGER

Senior Technical Product Manager with 8 years of experience building monetized data APIs, developer platforms, and algorithmic decision engines, generating **\$800K+ in ARR** and **\$450K+ in annual savings** across global enterprise retail partnerships.

EXPERIENCE

SquareTrade (Allstate Protection Plans)

Denver, CO

Senior Technical Product Manager (Platform and Developer Experience)

Feb 2025 – Present

Leading self-serve platform strategy and internal tooling to eliminate engineering bottlenecks for 10+ major retail partners.

- Built a self-serve Email/SMS communication platform enabling business teams to configure customer-facing logic without engineering intervention, saving **\$1M annually** in operational overhead & underwriting configuration costs.
- Led the transition from a legacy hard-coded logic system to a flexible Natural Language Rules Engine, enabling non-technical users to independently configure complex decision trees, saving **\$450K annually** in operational overhead.
- Integrated AI agents to translate business requirements into structured platform configurations, reducing rule-setup errors by **90%** and accelerating time-to-market for new policy logic.

Technical Product Manager (Data API and Monetization)

Jan 2022 – Feb 2025

Owned the Subscription Renewals Platform and Warranty Ingestion infrastructure, generating \$800K+ in ARR across 50M+ annual transactions.

- Identified a post-expiration revenue gap, discovered that pre-expiration outreach triggered a costly claim spike, and built a 0-1 Subscription Renewals API using a post-expiration model, generating **\$800K in new ARR** from Home Depot USA with **zero marketing spend**.
- Owned the Data API roadmap for high-volume enterprise partners including Walmart and Target, maintaining a **less than 5% failure rate** through robust schema validation and error-handling frameworks across **50M+ annual transactions**.
- Launched a Claims Settlement Reporting API for Staples Canada enabling cost recovery on legacy protection plan obligations inherited mid-contract, providing programmatic claim spend visibility and formalizing the invoicing process to secure the ongoing partnership.

OnTech Smart Services (DISH Network)

Greater Denver, CO

Senior Technical Product Manager

Aug 2021 – Jan 2022

Designed dynamic pricing models and go-to-market strategies for the smart home installation marketplace.

- Designed the Smart Home Advisor matching algorithm to pair technicians with high-propensity upsell opportunities, driving a **20% increase** in same-day revenue.

Technical Product Manager II

Feb 2020 – Aug 2021

Managed product roadmap for a multi-sided marketplace connecting smart home customers with technicians.

- Led the integration strategy for Google Nest, Ring, and Arlo ecosystems, enabling unified service fulfillment across disparate smart home hardware platforms.

DISH Network

Greater Denver, CO

Product Analyst (II/III)

Nov 2017 – Feb 2020

Partnered with software and data architects to migrate legacy enterprise systems to a modern web-based data platform.

- Defined SOAP-to-REST migration strategy for legacy enterprise systems, producing core API architecture documentation adopted by **50+ developers**.

EDUCATION

MBA, CU Boulder | MS IT and Management, UT Dallas | BS Computer Engineering, University of Pune
